6 Playback

Step 1: On the home page of the APP, select Group \rightarrow Device to enter the live preview interface.

Cloud video playback

(1) Start playing cloud video. You can also play cloud video by selecting the video file.

• Cloud recording must have purchased a cloud service package. If it is "motion detection" recording, the alarm switch must also be turned on.

Card video playback:

(1) Select the recording time and recording type, and the recording will start playback.

(2) Press and hold the time axis and slide left and right to switch the playing time.

Q: How does the camera store videos?

A: The camera currently supports maximum 128G FAT32 format, Class6 and Class10 TF cards. Earlier recordings will be deleted automatically when the TF card is full, and will do loop recording.

Q: The camera is offline abnormally?

A: 1. Check whether the power supply and network are normal.

2. Unplug the power cord to restart the device.

3. Check whether the password of Wi-Fi connection is entered correctly.

4. Check whether the router can access the Internet normally.

5. Power off the router and camera and restart them.

Q: The setting cannot be operated normally or cannot be started?

A: 1. Please make sure that both the mobile phone and the camera have successfully connected to the network.

2. Power off and restart the device.

3. Press the camera reset button to reset and re-configure the network for the camera.
