1. Products Appearance Description

LAN, Audio Output, VGA, HD, USB2.0, Power input port, Antenna.

2. Wi-Fi NVR Kits Quick Installation Guide

This Wi-Fi NVR Kits, no need cable, no need any set up, easy installation, plug and play, wireless communication uses automatic passwords generation mechanism to ensure that the monitored video will be not overheard under the default passwords, so please take it easy to use our system.

2.1. Install HDD

Make sure all power are cut before installing.

Installation tool: Cross screwdriver.

NOTE:

Please use the professional hard disk recommended by supplier.

Step 1: Unscrew the screws and remove upper cover.

Step 2: Connect one end of the hard disk power cable and data cable to the motherboard and the other end to the hard disk.

Step 3: Put NVR on its side, Align the screw thread with preserved holes on the chassis backplane, and then fix the screws.

Step 4: Install the upper cover and fix it by screws.

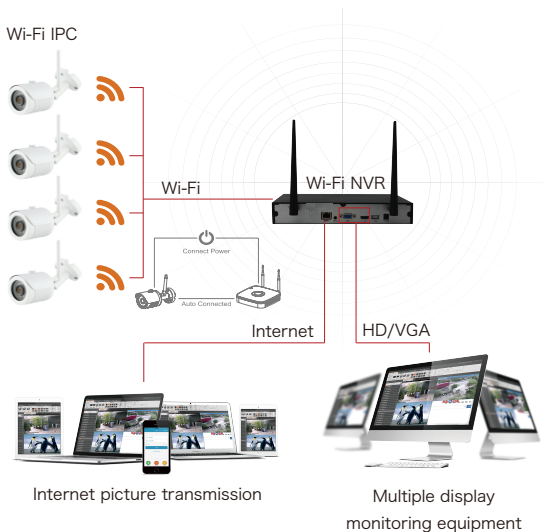

2.2. Make sure Wi-Fi NVR Kits working well.

Connect NVR to monitor, all devices are power on, no need any setting, auto-pair. When all the IPC videos appear on the display, the device works normally and can be installed in the next step.

Warning

Please make sure the NVR video output and monitor input have been connected. Please use the matched power supply in the package to prevent the NVR from working properly or damaging the NVR when the power supply is not working properly.

2.3. Adjusting the Antenna

The NVR antenna transmits signals to the surroundings. When the NVR and the IPC antenna are at the same height and parallel to each other, the effect is best. If the NVR can not be the same height, the IPC antenna should be tangent to the sphere with the center of the NVR (Figure 1, Figure2- 2). Don't let the antenna point directly NVR (Figure 2-1), according to the figure can be placed correctly.
